PUBLIC OFFER

regarding the participation of payment service providers in information, communication, and technological cooperation for monitoring accrued odds as part of the “Season of Luck 2.0” campaign

1. GENERAL PROVISIONS

1.1. This Public Offer (hereinafter referred to as the “Offer”) is an official proposal from “Common Republican Processing Centre” JSC (hereinafter referred to as “CRPC”) addressed to payment service providers registered in the Republic of Uzbekistan and holding the appropriate license in accordance with applicable law, to enter into an agreement on information, communication, and technological cooperation regarding the monitoring of accrued points and the application of the mechanism for awarding Additional Partner Points to Users of participating payment service providers as part of the “Season of Luck 2.0 campaign” (hereinafter referred to as the “Campaign”), conducted by CRPC.

1.2. This Offer has been developed in accordance with the Civil Code of the Republic of Uzbekistan, the laws of the Republic of Uzbekistan “On Payments and Payment Systems,” “On Personal Data,” “On Advertising,” “On Banking Secrecy,” “On Cybersecurity,” applicable regulations of the Central Bank, and the UZCARD Payment System Rules, as well as other applicable laws of the Republic of Uzbekistan.

1.3. Acceptance occurs when the CRPC receives a complete and unconditional Application in the form set forth in Appendix No. 1 to this Offer, signed by an authorized person either in person or using a valid electronic digital signature (hereinafter referred to as “EDS”). When using an electronic document management system, the payment service provider accepting this Offer shall prepare the Application, sign it with the EDS of its authorized representative, and submit it to the CRPC. The CRPC’s signature on the Application is not required for acceptance. Reservations, exceptions, and a protocol of disagreements do not constitute acceptance. Acceptance does not imply automatic activation of the Interface: activation of production access is carried out after verification and testing in accordance with Section 1.4 of this Offer.

1.4. The CRPC shall notify the Partner of the verification and testing period upon receipt of the Application, the required documents, and the necessary information. This period shall be communicated no later than 10 (ten) business days from the date of their receipt by the CRPC. Based on the results of the verification and testing, the CRPC shall, no later than 10 (ten) business days from the date of completion of testing, send a notification of activation specifying the Interface, its version, the authorized channel, the environment, the functionality to be activated, and the activation date; or, if applicable, provide reasoned comments and a deadline for rectification. Notifications are sent to the email address provided in the Application or via the electronic document management system used by the Parties. If there are comments or a need for additional information, the verification period will be adjusted, and the Partner will be notified. Production access will not be granted until an activation notice is issued.

1.5. Within the framework of the ICT Interaction, the Partner, at the initiative of a specific Authorized User, sends an Authorized Request with a Token to the CRPC; the CRPC ensures the generation and transmission of a Technical Response regarding the Odds Balance; and the Partner independently displays the received Odds Balance to the relevant User in the Partner’s communication channel interface with the User. The Partner’s transmission of information regarding actions for the accrual of Additional Partner Chances is carried out separately from the Authorized Request for the Balance of Chances, on a lawful basis and in accordance with Section 8 of this Offer.

1.6. CRPC does not post information on the Partner’s Interface, does not manage such Interface, and is not responsible for the use of such Interface. The Partner does not calculate, credit, cancel, or modify chances; does not determine winners of the campaign; and does not receive authorization to conduct the campaign.

1.7. ICT Interaction under this Offer includes the technical exchange of information regarding the Odds Balance, as well as the Partner’s transmission of information necessary for calculating odds—including details on transactions, their cancellations and refunds, the activation of promo codes, the invitation of new users, corrections to such information, and violations of the terms for awarding chances for such actions identified by the Partner, in the manner and according to the procedure set forth in Section 8 and Appendix No. 2 to this Offer. The ICT Interaction does not include any other functions not provided for in this Offer.

1.8. This Offer governs the payment service provider’s connection to the ICT Interaction as part of the campaign, the exchange of data, the provision and display of information regarding the number of chances, and establishes the payment service provider’s connection and the activation of the corresponding

functionality of its Interface as conditions for the CRPC to award Additional Partner Chances to its Users. Participation does not grant the Partner the status of the campaign's organizer or the authority to conduct it.

1.9. The Partner does not calculate, award, cancel, or modify chances; does not determine winners; and does not receive the authority to conduct the campaign. Only Base Chances are awarded for Qualifying Transactions under the general terms and conditions, regardless of whether the payment service provider has joined the Offer and activated its Interface. Additional Partner Chances are awarded for using promo codes and inviting new users as part of the Partner's referral program after the Partner joins the Campaign and activates the relevant functionality of the Interface via the CRPC: 2 (two) chances for each action, subject to compliance with Sections 3.9 and 3.10 of the Campaign Rules. No payment transaction is required for this.

1.10. The rules for earning, canceling, and using chances are established exclusively by the Rules of the "Season of Luck 2.0" campaign, approved by the CRPC. The official page of the campaign for reviewing the campaign rules is: https://promo.uzcard.uz/.

1.11. The offer is posted on the websites www.uzcard.uz and/or promo.uzcard.uz. The Organizer ensures equal conditions for the participation of payment service providers with comparable functionality and risk levels.

1.12. The Organizer's contact information: phone +998 71 200 28 28; registered address: 78 Abdulla Kadiriy Street, Shaykhantakhur District, Tashkent, Republic of Uzbekistan, 100011; e-mail: help@uzcard.uz; websites: www.uzcard.uz and promo.uzcard.uz.

1.13. If a specific term is not defined in this Offer, it shall have the meaning established by the Campaign Rules and the laws of the Republic of Uzbekistan.

2. TERMS AND DEFINITIONS

2.1. **Authorized Request** - a technical request from the Partner initiated by the User in the Partner Interface after the User has been properly authenticated and registered, provided that there is valid consent for the processing of the User's personal data by the Partner and the CRPC, the transfer of the necessary data to the CRPC, and the receipt of the Balance of Chances under the terms of this Offer. The composition of the data transmitted is defined in Sections 8.2 and 8.3 and Appendix No. 2 to this Offer; the specific set of fields depends on the type of request and the agreed-upon functionality.

2.2. **Chance Balance** means the total number of chances for the relevant User confirmed in the Campaign accounting system as of the time the Technical Response is generated, which is to be displayed in the Partner's Interface.

2.3. **Information, Communication, and Technology Interaction (ICT Interaction)** — interaction between the CRPC and the Partner regarding the exchange of data necessary for recording and monitoring transactions, including Authorized Requests and Technical Responses, in accordance with this Offer, applicable law, and the applicable requirements of "UZCARD" PS Rules, including the Standard "Information, Communication, and Technology Interaction for Providing a Service to View Information (Monitoring) on Bank Card Transaction History in the 'UZCARD' Payment System" to the extent applicable.

2.4. **CRPC** - "Common Republican Processing Centre" JSC which is the organizer of the campaign and ensures information, communication, and technological interaction between the CRPC and the Partner under this Offer.

2.5. **Partner Interface** - a digital channel for remote interaction with the User that is owned by the Partner or lawfully used by the Partner, including a mobile application, web interface, mobile interface, a Telegram bot, and other interfaces previously agreed upon with the CRPC, which ensure User authentication, confidentiality, and the display of the Odds Balance.

2.6. **Partner** - a payment service provider (bank or payment organization) operating in accordance with the laws of the Republic of Uzbekistan and having accepted this Offer by submitting an Application in accordance with Section 1.3 of this Offer. The Partner's access to the ICT Interaction is granted based on the CRPC's activation notice provided for in Section 1.4 of this Offer.

2.7. **User** - a legally capable individual who is the lawful holder of a "UZCARD" payment system bank card, duly authorized in the Partner's Interface, and who is a participant in the campaign in accordance with the campaign rules.

2.8. **Chance Monitoring** - the User's retrieval, on their own initiative via the Partner Interface, of information regarding the current Chance Balance through an Authorized Request and a Technical Response.

2.9. **Restricted-Circulation Information (RCI)** - personal data, information relating to a specific User or allowing for their direct or indirect identification, as well as, where applicable, banking secrecy and other information protected by law.

2.10. **Technical Response** - a message generated by the CRPC containing a masked card number, the number of credits accrued or canceled, the type of transaction or action, the date, the processing status, the credit balance, unique ID codes, and error codes.

2.11. **Card Token** - a technical identifier that is mapped to the confidential data of the "UZCARD" payment system bank card through the CRPC tokenization system and is used to exchange data without transmitting the card details to the Partner in plain text.

2.12. **Authentication** - verification that the User is the owner of the Account and that the User's access to the Partner's Interface is authorized, using one or more identification methods provided by the Partner and required by law, including a password, one-time code, digital signature, biometric factor, or other agreed-upon factor.

2.13. **Linked Card -** a valid "UZCARD" payment system bank card, the User's rights to which have been verified by the Partner, and which is linked to the User's Account using the verification mechanisms provided by the bank, the "UZCARD" payment system, and the Partner. For the purposes of Chance Monitoring, a third-party card is not considered a Linked Card.

2.14. **Registration** - the set of actions taken by a Partner and an individual to create an Account, accept the applicable terms of use, verify contact information, verify identity, and configure access data to the extent necessary to gain access to Odds Monitoring.

2.15. **Qualifying Transaction** - a transaction in the amount of 100,000 (one hundred thousand) sum or more that meets the types and other conditions specified in the Campaign Rules.

2.16. **Base Chance** - a fixed notional unit of participation awarded by the Organizer for a qualifying transaction under the main mechanics of the campaign: 1 chance for an online payment, 2 chances for a P2P transfer, and 3 chances for a payment via Tez QR.

2.17. **Additional Partner Chance** — a notional unit of participation in the Campaign awarded by CRPC for using promo codes and inviting new users to Partner Interfaces as part of their referral programs. For each new user, the User who invited them is awarded 2 (two) chances, and for the successful activation of a promo code, the User who activated it — 2 (two) chances, subject to compliance with Sections 3.9 and 3.10 of the Campaign Rules, after the Partner joins the Offer and activates the corresponding functionality on their Interface. Such chances do not depend on the completion of a payment transaction and are not awarded for Qualifying Transactions.

2.18. A "Chance" is not a monetary instrument, electronic money, a Partner's reward, or a property right; it has no monetary value and is used solely for an individual's participation in the campaign.

3. SUBJECT OF THE OFFER

3.1. CRPC and the Partner organize and maintain informational, communicational, and technological interaction, whereby the Partner transmits an Authorized Request with a Token to CRPC, CRPC verifies the technical validity of the request, generates and transmits a Technical Response, and the Partner displays the Chance Balance to the relevant User in the Partner's Interface. The Partner also transmits information regarding transactions, their cancellations and refunds, the activation of promo codes, the invitation of new users, and identified violations of the terms governing the accrual of chances for such actions—information necessary for the CRPC to account for chances—in the format and manner specified in Section 8 and Appendix No. 2 to this Offer.

3.2. CRPC's actions regarding a specific Authorized Request are completed upon transmission of a Technical Response to the Partner, who subsequently ensures that the information is displayed in the Interface.

3.3. The Odds Balance is for informational purposes only; it has no intrinsic monetary value, is not electronic money or a payment instrument, and does not guarantee the receipt of a prize.

3.4. The Partner configures a screen or "Campaigns" section within its Interface, uses the Technical Response solely to display the Odds Balance to the relevant User, and ensures security and compliance with applicable laws. The Partner handles inquiries regarding the operation of its Interface, registration,

authentication, card linking, the transfer of data to it, and the display of the Technical Response. The CRPC handles inquiries regarding the Campaign Rules, the accrual and cancellation of chances in its system, winners, and prizes. In response to such inquiries, the Partner shall provide the User with the CRPC's contact information and transfer the necessary data where there is a legal basis to do so, while retaining the obligation to remedy violations within its area of responsibility.

3.5. Each Party shall independently bear the costs of developing, integrating, and supporting its own systems and fulfilling its obligations, unless otherwise agreed upon separately in writing.

3.6. This Offer does not create an agency, joint venture, representative office, franchise, or exclusive partnership relationship, nor does it restrict the Partner's or the CRPC's right to interact with other parties.

4. REGISTRATION, IDENTIFICATION, AND PROCEDURE FOR MONITORING ODDS

4.1. Odds monitoring is available only to individuals who have completed Registration and the required Identification in the Partner's Interface, accepted the Partner's user offer or agreement, have a valid account, and comply with the requirements of applicable law and the campaign rules.

4.2. The Partner independently organizes the User's registration, identification, and authentication and is responsible for their legality, sufficiency, and verifiability. CRPC does not register the User on the Partner's Interface or verify the User's identity, unless otherwise expressly provided by law or a separate written agreement between the Parties.

4.3. In the event of the expiration or invalidity of an identification document, a material change in identification information, a change in phone number or device, signs of fraud, or any other increased risk, the Partner shall suspend Odds Monitoring until the User has been re-verified to the extent necessary.

5. RIGHTS AND OBLIGATIONS

5.1. **The Partner agrees to:**

5.1.1. submit Authorized Requests only in the interests of the relevant User, after the User has been authenticated, at the User's initiative, and provided there is valid consent to the processing of the User's personal data or another directly applicable legal basis;

5.1.2. ensure the lawfulness, completeness, and verifiability of the User's consent to the processing of their personal data, the validity of the Token, the security of the Interface, and the targeted nature of the actions and activities of its employees, contractors, and other involved parties;

5.1.3. Include in its own public offer or agreement with the User terms regarding the processing of personal data by the Partner and the CRPC, specifying the purposes, legal basis, scope of data, operations, timeframes, recipients, the User's rights, and the method for withdrawing consent. Information regarding the CRPC's data processing is provided based on the terms supplied by the CRPC. The Partner shall obtain and retain evidence of the necessary consents and provide confirmation to the CRPC upon request. The inclusion of terms in the offer does not replace the required consent. The liability of the Parties is delineated in Section 9.2 of this Offer;

5.1.4. Comply with confidentiality, personal data, banking secrecy, and information security requirements, and respond to incidents in accordance with the UZCARD Payment System Rules, this Offer, and applicable law;

5.1.5. Immediately cease new requests and display upon the User's withdrawal of consent to the processing of their personal data, loss of authorization, compromise of the Token or keys, termination of rights to the Interface, or receipt of a notification from the CRPC regarding the termination of the ICT Interaction under this Offer.

5.1.6. ensure the functionality of the integration, the accuracy and timeliness of the data transmitted by it, the display of the Odds Balance in exact accordance with the most recent Technical Response received,

and the Interface's compliance with information security requirements; in the event of a technical delay, inform the User that the displayed information may be out of date, in accordance with Section 7.8 of this Offer;

5.1.7. not to promise guaranteed winnings, a monetary value for chances, an increased number of chances outside the approved mechanics, or exceptional advantages of its Interface;

5.1.8. The Partner is obligated to promptly provide accurate information regarding transactions, their cancellations and refunds, the activation of promo codes, the invitation of new users, and any violations of the terms for awarding chances identified by the Partner; verify that an invited user has registered with this Partner for the first time, prevent self-referrals, the reuse of a single promo code by a single User, and duplicate entries in its Interface to the extent of the information available to the Partner; not to create artificial transactions, registrations, or activations, and to cooperate with CRPC audits upon a reasoned request from CRPC within the scope of this Offer. The Partner shall ensure the transfer and reconciliation of verified information for the relevant sub-stage prior to the formation of the final list of ID codes in accordance with Section 3.12 of the Campaign Rules, the deadline for which the CRPC shall notify the Partner no later than 3 (three) business days in advance;

5.1.9. The Partner is obligated to immediately notify of any changes to its license, rights to the Interface, contact information, responsible persons, integration architecture, or other circumstances affecting the performance of the Offer.

5.2. **The CRPC agrees to:**
5.2.1. generate a Technical Response based on the official records of the campaign and the requirements of this Offer;

5.2.2. apply uniform conditions for eligibility, calculation, and display of odds; maintain official records; and provide the Partner with the statuses specified in the integration;

5.2.3. maintain confidentiality and ensure the protection of RCI and other protected information, and not disclose it to third parties without a legal basis;

5.2.4. restrict or suspend the ICT Interaction only if there are grounds specified in the Offer, legal requirements, or the Rules of the "UZCARD" Payment System.

5.2.5. take reasonable measures to restore the operation of its systems and rectify confirmed errors caused by the CRPC; notify the integration manager designated by the Partner of any scheduled work affecting the ICT Interaction in advance, but no later than 2 (two) business days prior; and regarding unplanned downtime—upon its detection and initial assessment, but no later than 2 (two) hours from the time of detection—as well as regarding the restoration of service. In the event of a security incident, Section 9.6 of this Offer shall apply. Guaranteed availability metrics and fixed restoration times may be established only by a separate written agreement between the Parties.

5.3. **The Partner has the right to:**
5.3.1. Receive technical documentation, clarifications, test access, and notifications of changes necessary for the performance of this Offer;

5.3.2. rely on the application of the same connection criteria and the same terms for calculating and determining the number of Additional Partner Opportunities as those applied to other Interfaces with comparable functionality;

6. EQUAL ACCESS AND NON-DISCRIMINATORY CONDITIONS

6.1. A Partner that complies with the legal, technical and information security requirements of this Offer and conducts its activities in accordance with the applicable legislation of the Republic of Uzbekistan shall be eligible to join. The Partner's name, brand, customer base size and commercial relations with CRPC shall not, in themselves, constitute grounds for granting any advantage.

6.2. Uniform verification criteria and identical requirements regarding transmitted data, testing, information display, data protection, and the processing of cancelled transactions and invalid actions under promo codes and the referral program shall apply to all Partners.

6.3. CRPC and the Partner shall not be entitled to announce or apply an increased number of chances solely in connection with the use of a particular brand or Interface. Additional Partner Chances for promo codes and invitations of new users shall be credited on uniform terms stipulated by the Campaign Rules and this Offer, after the Partner joins and the relevant functionality of its Interface is activated.

6.4. Only Basic Chances shall be credited for Qualifying Transactions on the general terms of the Campaign Rules. Conducting a transaction through an activated Partner Interface shall not increase the number of chances. Additional Partner Chances shall be credited exclusively for the actions provided for in Clauses 3.9 and 3.10 of the Campaign Rules, in accordance with Section 7 of this Offer.

6.5. Joining the Offer and activating the relevant Interface functionality are mandatory conditions for the accrual of Additional Partner Chances, but do not, in themselves, create any entitlement to receive such chances. In order for such chances to be credited, the User must fulfil the conditions for using a promo code or inviting a new user as provided for in the Campaign Rules. The Partner independently selects the functionality to be activated in the Application. Operation of the referral program and distribution of promo codes are not mandatory for the Partner; Chance Monitoring may be activated without such functionality.

6.6. CRPC shall publish on its official website an open list of Partners that have joined this Offer, indicating the type of Interface and the date of its activation.

6.7. Refusal to activate, suspension or deactivation shall be permitted only on objective legal, technical or information security grounds, including the absence of the required authority or licence, incomplete or inaccurate documents, API non-compliance, failure to pass testing, a security threat, violation of the Offer, or termination of the right to use the Partner Interface.

6.8. CRPC shall inform the Partner of the identified reasons for refusal or suspension and, if the violation can be remedied, shall provide the Partner with an opportunity to reapply after such violation has been remedied.

6.9. Additional Partner Chances shall not be credited for actions performed before the Partner joined the Offer and before CRPC activated the relevant functionality of its Interface. This restriction shall not prevent confirmed actions performed after activation from being taken into account where information regarding such actions was received or processed with a delay: such chances shall be attributed to the sub-stage during which the action was actually performed, in accordance with Clause 3.12 of the Campaign Rules.

7. MECHANICS FOR ACCRUAL AND DISPLAY OF CHANCES

7.1. The period for the accrual of chances under the Campaign shall be from 12:00:00 am on 04 September 2026 to 11:59:59 pm on 30 November 2026, unless another period is established and published in the Campaign Rules.

7.2. The minimum amount of one Qualifying Transaction for the accrual of Basic Chances shall be UZS 100,000 (one hundred thousand). Several transactions shall not be combined in order to reach the minimum threshold. No payment transaction is required for the accrual of Additional Partner Chances for promo codes and invitations of new users.

7.3. The number of chances for one Qualifying Transaction or a separate action shall be determined in accordance with the following table. The conditions for the accrual of Additional Partner Chances are established by Clauses 7.11–7.13 of this Offer and Clauses 3.9 and 3.10 of the Campaign Rules:

Type of transaction or action	Basic Chances	Additional Partner Chances	Total Chances
Online payment (e-commerce)	1	0	1
P2P card-to-card transfer	2	0	2
Payment via Tez QR	3	0	3
Standard POS payment	Not eligible	Not accrued	0

Successful activation of a promo code (without a payment transaction)	0	2	2
Invitation of a new user under the referral program (without a payment transaction)	0	2 to the inviting User	2

7.4. The amount of a transaction exceeding the minimum threshold shall not increase the number of Basic Chances. One transaction in the amount of UZS 200,000 shall provide the same number of chances as one transaction in the amount of UZS 100,000 of the corresponding type.

7.5. Transactions conducted through standard POS terminals, cash withdrawals, top-ups, conversions, fees, transactions below the minimum amount, and other transactions excluded by the Campaign Rules shall not generate Basic Chances. This shall not prevent the separate accrual of Additional Partner Chances for promo codes and invitations of new users, provided that the Campaign Rules are complied with.

7.6. In the event of cancellation, refund, or recognition of a transaction as erroneous, fictitious or made in bad faith, CRPC shall cancel the Basic Chances accrued for such transaction. Additional Partner Chances shall be cancelled where non-compliance with the accrual conditions for the relevant promo code activation or invitation of a new user has been confirmed, including in cases of duplicate accrual or actions performed in bad faith, in accordance with the Campaign Rules. CRPC shall notify the Partner of the cancellation of Additional Partner Chances in the Technical Response, indicating the reason code. Cancellation or refund of a payment transaction shall not, in itself, constitute grounds for cancellation of chances accrued for a promo code or invitation.

7.7. The accrual, cancellation, final balance and unique ID codes shall be determined exclusively by the CRPC information system. Data independently calculated or displayed by the Partner shall not alter the official records.

7.8. Display of chances may be subject to a technical delay required to confirm the transaction or action, transmit data and process adjustments. The Partner shall display the current status to the User and shall not guarantee immediate display until confirmation is received from CRPC. Chances for promo codes and invitations of new users shall be attributed to the sub-stage during which the relevant action was performed, regardless of the date on which the information was processed, subject to Clause 3.12 of the Campaign Rules.

7.9. Unique ID codes shall be generated upon completion of the relevant sub-stages and may be transmitted to the Partner for display after they have been generated by CRPC.

7.10. Changes to the Campaign mechanics shall apply to all activated Interfaces on uniform terms from the date specified in the published version of the Campaign Rules and shall not affect chances already confirmed, unless otherwise expressly provided by law and this Offer. The Campaign Rules shall not, by themselves, amend the Partner's obligations and liability under this Offer. The relevant amendments to the Offer shall be introduced in accordance with Clause 12.2; amendments to technical documentation shall be permitted within the scope of interaction provided for by the Offer. If the Partner disagrees, it shall be entitled to terminate ICT Interaction in accordance with Clause 12.10 of this Offer.

7.11. For each new user who, during the Campaign Period, registers for the first time with the relevant Partner using the User's personal referral link or code, the inviting User shall be credited with 2 (two) Additional Partner Chances. Registration of a person who has previously been registered with that Partner through another of its Interfaces, or re-registration after deletion of an account, shall not be taken into account. The Partner shall verify such circumstances on the basis of information whose storage is permitted by personal data legislation and shall not be required to retain the personal data of persons who have deleted their account solely for the purposes of the Campaign. For one new user with one Partner, chances shall be accrued only once to one inviting User, using whose link or code the registration was completed. Self-referral shall not be taken into account.

7.12. For successful activation of a valid promo code, with confirmation of its acceptance in the Partner Interface activated by CRPC, the User shall be credited with 2 (two) Additional Partner Chances. One promo code may be used by one User no more than once during the Campaign Period, including when different Interfaces are used. The validity period of the promo code and the permitted Interfaces shall be communicated to the User when the promo code is distributed. Chances for promo codes and invitations shall be accrued independently and added together. Use of a referral code when registering an invited person shall not, in itself, be deemed activation of a promo code.

7.13. Additional Partner Chances shall be accrued to a UZCARD card belonging to the User and linked to the User's account with the Partner; where the User has several cards, the User shall select one before performing the action. If the User has not selected a card, the chances shall be recorded against the card designated as the primary card in the Partner Interface. For an invitation, the chances shall be recorded against the selected card of the inviting User. Having several cards, replacing a card or using several Interfaces shall not entitle the User to repeated accrual for the same action. The chances shall be attributed to the sub-stage of completion of registration of the invited person or successful activation of the promo code, including where transmission or processing of information is delayed. Before the final list of ID codes is generated, CRPC shall conduct reconciliation with the Partners in accordance with Clause 3.12 of the Campaign Rules.

8. TECHNICAL INTERACTION

8.1. Data exchange shall be carried out through agreed APIs, endpoints in SVGate and/or other secure channels provided for in the Organizer's technical documentation.

8.2. The Partner shall transmit only the data necessary depending on the type of request or message and the agreed functionality: Partner and Interface identifiers, the User's Card Token; when transmitting transaction information — also the unique transaction identifier, transaction type, amount, date and time, status, and information on cancellation or refund. For the purposes of recording promo codes and invitations, the unique event identifier, type of action, date and time of its completion, confirmation status, and the identifier of the promo code or referral link or code shall be transmitted. In the case of an invitation, the Token of the selected card of the inviting User, the technical identifier of the invited user enabling detection of repeated registration with the same Partner, and confirmation of the first registration and absence of self-referral shall be specified. In the case of an adjustment, the original event and the reason shall be specified. A telephone number may be transmitted only where there is a lawful basis and a direct technical necessity. The formats and mandatory nature of the fields shall be determined by the technical documentation within the scope of the data specified above. Excessive personal data of the invited person shall not be transmitted. Transmission of data beyond the scope specified above shall be permitted only after a lawful basis has been established and the corresponding amendments have been made to the Offer.

8.3. CRPC shall transmit to the Partner the data provided for by the integration: masked card number, number of accrued or cancelled chances, type of transaction or action, date, processing status, chance balance, unique ID codes and error codes.

8.4. The Partner shall display the data without independently modifying, rounding or recalculating it. In the event of any discrepancy, CRPC data shall prevail.

8.5. The integration shall support accrual, cancellation, repeated requests without duplicate accrual, processing of technical errors, logging of requests, verification of promo code and invitation conditions, as well as reconciliation of control transactions and actions.

8.6. Prior to launch, the Partner shall provide a separate test environment, appoint responsible technical personnel and remedy any identified issues.

8.7. The Partner shall not have access to the draw algorithms and shall not be entitled to create, modify, delete or assign unique ID codes, or otherwise interfere with the official accounting of chances.

8.8. Transfer of access to the API, keys, technical documentation or integration functions to a third party shall be permitted only with the prior written consent of CRPC.

9. PERSONAL DATA, CONFIDENTIALITY AND SECURITY

9.1. The Parties shall process and protect personal data and other information protected by law in accordance with the legislation of the Republic of Uzbekistan and only to the extent necessary for the integration and implementation of the Campaign.

9.2. Each Party shall independently ensure the lawfulness of its processing of personal data, the availability of the necessary legal basis and compliance with data protection requirements, and shall be liable for its own violations. The Partner shall be responsible for properly informing the User, obtaining and being able to evidence the required consents within its Interface, as well as for the lawfulness of collecting and transmitting data to CRPC. CRPC shall be responsible for the lawfulness of processing the received data within its systems and within the stated purposes. Such allocation of responsibilities shall not release the Partner from its obligations under Clauses 5.1.2 and 5.1.3 of this Offer.

9.3. The principles of data minimization, tokenization and masking shall apply. Transmission and storage of the full card number, PIN code, passwords, one-time confirmation codes and other excessive payment credentials shall be prohibited.

9.4. The Parties shall apply legal, organizational and technical protection measures, including channel encryption, request authentication, segregation of access rights, key protection, logging and access control.

9.5. The information received shall be confidential and shall not be disclosed, distributed or used for other purposes without a lawful basis and agreement with the Party that provided such information.

9.6. In the event of an identified incident, data leak, unauthorized access, data substitution or security breach, the affected Party shall notify the other Party immediately, but no later than within 24 hours from the moment of detection, and shall take measures to limit the consequences.

9.7. Upon completion of the interaction, the data shall be deleted, anonymized or retained further only in the cases and for the periods expressly provided for by law or where necessary to protect the lawful rights of the Party.

9.8. Cross-border transfer and storage of data outside the Republic of Uzbekistan shall be permitted only subject to compliance with applicable legal requirements and the existence of the necessary legal grounds.

9.9. Where necessary, the Parties shall execute separate technical documents, a confidentiality agreement or a data processing agreement. Such documents may not establish an increased number of chances for a specific application or any other unjustified advantage.

9.10. Receipt, transmission and use of information constituting bank secrecy within the framework of this Offer shall be permitted exclusively where there are legal grounds and in accordance with the procedure established by the legislation of the Republic of Uzbekistan, and only to the minimum extent necessary for the relevant purpose.

9.11. The Receiving Party shall use information constituting bank secrecy exclusively for the performance of this Offer and within the limits of the lawful basis on which such information was obtained. Disclosure of such information to third parties shall be permitted only where there are legal grounds and in accordance with the procedure established by the legislation of the Republic of Uzbekistan. The consent of the Disclosing Party, the provisions of this Offer and the UZCARD Payment System Rules shall not, in themselves, constitute an independent legal basis for disclosure of bank secrecy. Consent to the processing of personal data shall not substitute the legal basis for access to bank secrecy prescribed by law.

10. USER INFORMATION AND BRAND USE

10.1. All communications displayed in the Partner Interface shall comply with the Campaign Rules, this Offer, advertising legislation and the materials approved by CRPC.

10.2. With respect to the activated functionality, the Partner Interface shall specify the name and period of the Campaign, the minimum amount of a Qualifying Transaction and the number of Basic Chances, the conditions for accrual of 2 (two) Additional Partner Chances for successful activation of a promo code and 2 (two) Additional Partner Chances to the inviting User for each new user, the absence of any requirement to perform a payment transaction for such actions, a link to the Campaign Rules, and support contact details.

10.3. The Partner shall not create the impression that the Campaign is conducted exclusively through its Interface or that users of other activated Interfaces are subject to less favorable conditions.

10.4. Trademarks, trade names, designs and other intellectual property objects belong to their respective right holders. Their use shall be permitted solely for the purposes of performing this Offer and in accordance with the approved brand guidelines.

10.5. Public announcements, press releases, banners and other advertising materials using the UZCARD brand shall be subject to prior approval by CRPC, unless otherwise expressly provided for in the package of materials supplied. CRPC’s use of the Partner’s trademarks and logos in advertising materials shall be permitted with the Partner’s prior written consent, including by approval of the relevant package of materials, and subject to compliance with the Partner’s brand usage requirements. Indication of the Partner’s name and its Interface in the public list under Clause 6.6 of this Offer shall not require any additional approval.

11. LIABILITY AND FORCE MAJEURE

11.1. The Parties shall be liable for breach of their obligations in accordance with this Offer and the legislation of the Republic of Uzbekistan.

11.2. The Partner shall be responsible for the proper operation of its Interface, the accuracy of the data transmitted, the lawfulness of processing Users' personal data, the correctness of the user interface, and the security of the access keys provided to it.

11.3. The Partner shall be responsible for the lawfulness of initiating requests, User authentication, the availability of consent to the processing of personal data, the validity of the Token ownership, the security and proper operation of the Interface, targeted display of information, the security of keys, and the actions of engaged persons.

11.4. CRPC shall be responsible for generating the Technical Response, securely transmitting it to the Partner, and rectifying confirmed errors attributable to CRPC. CRPC shall organize the Campaign, maintain the official records, accrue and cancel chances, determine the winners, and award prizes in accordance with the Campaign Rules and applicable legislation. CRPC's liability to the Partner shall be governed by the Offer, including Clause 11.5, while its liability to participants shall be governed by the Campaign Rules and applicable legislation. CRPC shall not be liable to the Partner for consequences caused by inaccurate or untimely data transmitted by the Partner or by failures or violations in the Partner's systems.

11.5. Documented direct losses shall be recoverable to the extent caused by the culpable breach of a Party. Loss of profit and indirect losses shall not be recoverable to the extent permitted by law. Such limitations shall not apply to wilful misconduct, gross negligence, or liability that may not be limited by law.

11.6. CRPC shall not be liable for the inability to display chances caused by the unavailability of the Partner's Interface, network or systems, or by actions of the User or third parties beyond CRPC's control. The Partner shall not be liable to Users or CRPC for the correctness of the accrual, cancellation and accounting of chances, determination of winners and awarding of prizes, or for the inability to display or the inaccuracy of the Chance Balance caused by the unavailability of or errors in CRPC systems. Requests and claims from participants regarding these matters, including those received by the Partner, shall be reviewed and resolved by CRPC.

11.7. A Party that has caused an incident or erroneous transmission of data shall be obliged to assist in restoring accurate records and minimizing the consequences for participants.

11.8. The Parties shall be released from liability for failure to perform their obligations due to force majeure circumstances that could not reasonably have been foreseen or prevented, provided that the other Party is notified in a timely manner.

12. FINAL PROVISIONS AND DETAILS

12.1. Up-to-date information on the Campaign shall be published on the CRPC website and/or its official pages and may also be published in the Partner Interface.

12.2. The Organizer shall be entitled to unilaterally amend the terms of the Offer. Amendments shall enter into force from the moment of their publication on the official CRPC website, unless another effective date is specified in the relevant publication. If the amendments require modifications to the integration or the Interface, CRPC shall specify in the notice to the Partner the implementation period, taking into account the scope of the required modifications. Amendments necessary to comply with mandatory legal requirements, instructions of authorized authorities, or to eliminate security threats may be applied immediately upon notification of the Partner. If such amendments cannot be implemented in a timely manner, CRPC shall be entitled to suspend the relevant functionality until the non-compliance is remedied. If the Partner disagrees with the amendments, it shall be entitled to terminate ICT Interaction in accordance with Clause 12.10 of this Offer. CRPC shall send the Partner a notice of any amendments to the Offer to the e-mail address specified in the Application simultaneously with their publication. Amendments increasing the Partner's obligations or liability shall enter into force for the Partner no earlier than 10 (ten) business days from the date of such notice, except for amendments necessary to comply with mandatory legal requirements, instructions of authorized authorities, or to eliminate security threats. If, within the specified period, the Partner sends a notice of termination of ICT Interaction pursuant to Clause 12.10 of this Offer, such amendments shall not apply to the Partner.

12.3. CRPC shall not be liable for:

- the Partner's inability to familiarize itself with the terms of this Offer published by CRPC on the website www.uzcard.uz;

- untimely performance or non-performance by the Partner of the obligations provided for by this Offer.

12.4. The Parties shall seek to resolve disagreements through negotiations and the exchange of written or electronic communications. The period for consideration of a claim shall be 10 (ten) business days from the date of its receipt.

12.5. If a dispute cannot be resolved, it shall be considered by the competent court of the Republic of Uzbekistan in accordance with the procedure established by law.

12.6. Legally significant notices may be sent to the e-mail addresses and other contact details specified in the Offer and the Application for Accession, provided that the sending and receipt thereof can be confirmed.

12.7. The invalidity of any individual provision shall not result in the invalidity of the remaining terms. The Parties shall apply a lawful provision that is closest in meaning.

12.8. In the event of any conflict between the Offer and the Campaign Rules, matters relating to the accrual and use of chances by participants shall be governed by the Campaign Rules, while matters relating to interaction between the Organizer and the Partner shall be governed by this Offer. In all cases, the legislation of the Republic of Uzbekistan shall apply.

12.9. Organizer's details: "Common Republican Processing Centre" JSC; address: 78 Abdulla Qodiriy Street, Shaykhantakhur District, Tashkent, 100011, Republic of Uzbekistan; telephone: +998 71 200 28 28; e-mail: help@uzcard.uz; websites: www.uzcard.uz and promo.uzcard.uz.

12.10. The Partner shall be entitled to terminate further ICT Interaction by sending CRPC a notice signed by an authorized person in accordance with Clause 12.6. ICT Interaction shall terminate on the date CRPC receives the notice or on a later date specified therein. From that date, the Partner shall cease initiating new requests and displaying information, and CRPC shall be entitled to disable access. The Partner shall inform Users in advance and remove communications indicating that the interaction continues.

12.11. Termination of ICT Interaction shall not cancel chances lawfully accrued: their accounting and use shall be governed by the Campaign Rules. Obligations relating to confidentiality, data protection, remediation of the consequences of previous violations, transmission and reconciliation of information on previously performed transactions and actions, as well as their cancellations, refunds and adjustments, and liability for violations committed shall remain in force. Obligations to transmit and reconcile information shall remain in force until reconciliation for the sub-stage during which ICT Interaction was terminated has been completed. Subsequent data processing shall be permitted only where there is a lawful basis and subject to compliance with Clause 9.7 of this Offer.

Appendix No. 1
to the Public Offer
on the accession of payment service providers to information, communication and technological interaction for monitoring accrued chances within the "Season of Luck 2.0" Campaign

APPLICATION FOR ACCESSION TO THE PUBLIC OFFER

The Partner hereby confirms its full and unconditional acceptance of the terms of the Public Offer and requests that the Interface specified below be connected to ICT Interaction under the Campaign.

Details	Partner Information
Full legal name of the legal entity	
Legal form	
TIN	
Registered and postal address	
Licence number / legal basis for conducting activities	
Application name	
Operating systems and links to the application	
Selected functionality	Chance Monitoring / promo codes / referral program (specify the requested functions)
Person responsible for integration: full name, position, telephone, e-mail	
Person responsible for legal matters and personal data	
Expected date of readiness for testing	

The Partner confirms that it has all necessary authority, licences, rights to the declared Interface, and lawful grounds for processing and transmitting data, and that it is ready to comply with the technical requirements, information security requirements, and uniform conditions for the accrual of chances.

The Partner confirms that it will send Authorized Requests for the Chance Balance only at the initiative of a User who has completed the required registration, identification and authentication, in respect of the User's own Linked Card, and shall ensure prior notification, consent to the processing of the User's personal data, a lawful basis for access to bank secrecy where required, and the possibility of withdrawing the relevant expressions of consent. Information for the accrual and adjustment of chances shall be transmitted separately, where there is a lawful basis, in the scope and in accordance with the procedure set out in Section 8 of the Offer.

Detail	To be completed by the Partner
Authorized person	
Position	
Signature / EDS	
Date	

Appendix No. 2
to the Public Offer
on the accession of payment service providers to information, communication and technological interaction
for monitoring accrued chances
within the "Season of Luck 2.0" Campaign

MINIMUM FUNCTIONAL AND TECHNICAL REQUIREMENTS

Section	Minimum Requirement
Registration	Transmission of the application identifier and card token via the agreed API/endpoint. The telephone number shall be transmitted only where there is a lawful basis and technical necessity.
Qualifying Transaction	Transmission of the unique transaction identifier, transaction type, amount, date and time, status, Interface identifier, and cancellation/refund indicator.
Promo Codes	Information on confirmed promo code activation shall be transmitted in accordance with Clause 8.2 of the Offer. A single promo code may be used by one User only once during the Campaign Period, including across different Interfaces. CRPC shall control repeated use of a promo code across the Interfaces of different Partners; the Partner shall ensure such control within its own Interface.
Referral Program	Information on the first registration of the invited person with the Partner, the link to the inviting User, and the selected card of the inviting User shall be transmitted within the scope specified in Clause 8.2 of the Offer. Re-registration, self-referral and duplicates shall be excluded. The data shall be reconciled before the final list of ID codes is generated.
UZCARD Response	Receipt of the processing status, number of accrued or cancelled chances, masked card number, type of transaction or action, and error message.
Information Displayed in the Interface	Display of the Campaign name, total Chance Balance, recent accruals and cancellations, a link to the Rules, and, where technically available, unique ID codes for the draws.
Display Speed	Data shall be displayed after confirmation is received from UZCARD. A delay may occur due to transaction or action processing or system unavailability.
Data Source	The Partner shall not independently calculate or modify chances. UZCARD data shall prevail in the event of any discrepancy.
Cancellations and Adjustments	The system shall support receipt and display of cancellation of Basic Chances for a cancelled or refunded transaction and adjustments to Additional Partner Chances for an invalid or duplicate-recorded action. Cancellation of a payment transaction shall not, in itself, cancel chances accrued for a promo code or invitation.
Errors	The system shall process an invalid token, a transaction below the threshold, an ineligible transaction type or duplicate transaction, cancellation/refund, an invalid or previously used promo code, repeated invitation, registration of a previously registered user, self-referral, duplicate event, technical error, and temporary unavailability.
Security	Encryption of communication channels, request authentication, access control, logging, key protection, and separate test and production environments.
Prohibited Data	Transmission or storage of the full PAN, CVV/CVC, PIN code, and other data not provided for in the agreed technical documentation shall not be permitted.
Testing	Prior to activation, the following shall be tested: Basic Chances of 1/2/3 for the relevant transactions; the UZS 100,000 threshold; 2 Additional Partner Chances each for a promo code and an invitation without a payment transaction; aggregation of chances accrued on different grounds; exclusion of duplicates, repeated registrations and self-referral; linkage to the selected card; adjustments; attribution to the relevant sub-stage; repeated requests; and display. No additional chance shall be accrued for a transaction conducted through the Partner Interface.
Publication	Following successful testing, CRPC shall send an activation notice in accordance with Clause 1.4 of the Offer, specifying the functionality being activated, and shall include the Interface in the public list of connected Interfaces.

Detailed API formats, the list of fields, statuses, error codes, requirements for keys, checksums and logging shall be provided separately to the approved Partner. Such documents may not amend the uniform conditions for the accrual of chances established by the Offer.
